PRIMARY EXAMINER

DETAILED ACTION

Allowable Subject Matter

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance.

The limitations that are primarily responsible for distinguishing claims 1-7 and 15-17 over the prior art are the limitations concerning a laser light source that wavelength division demultiplexes the remaining part of the amplified optical signals, and outputs signals mode-locked to the demultiplexed signals, and a first circulator that inputs the remaining part of the amplified optical signals into the laser light source as recited in independent claim 1.

The invention recited in independent claim 1 was not found in the prior art. Also, proper motivation to combine references to form the invention recited in the first claim was not found in the prior art.

Regarding claims 8-14, the invention recited in independent claim 8 was not found in the prior art. Also, while the individual elements recited in these claims were found in the prior art, proper motivation to combine the references that disclosed these elements was not found in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following references are considered to be representative of the relevant prior art. These references disclose most of the recited elements, but are not sufficient to form a prior art rejection as noted above. Ellis et al.(6,813,447), Uchiyama et al.(6,204,944), Matsuoka et al.(6,771,854), Jeon et al.(6,256,432), Chang et al.(6,873,797), Miyazaki et al.(6,532,091), and Huber(5,283,686).

Examiner's Comments

4. The spelling of applicants' names have been corrected as requested.
